

Touch Design - Tutorial and How to use

Touch Design Page type is more than just a fun page to use in your app - it's a powerful and useful tool for creating real sports strategies and tactics or for having a drawing board in your app.

With this simple yet incredibly versatile page type, you can create, save and share complex sports tactics or kids drawings.

How to add and edit:

1. In order to add a new Touch Design page to your app access its **Dashboard**. Go to **Edit Pages** menu then click the "+" (Add New Page) button.

From the list of the page types available select the Touch Design one and click the "**Create**" button. Once the page is added, you are able to proceed with editing it.
