

Product Order Tutorial

The **Product Order** page type + **Order** page type is the best way for you to start taking orders for the products you're selling using the mobile app developed on Appsmoment.

In addition to the Order page type, we've added a native page for adding items/products - **Product Order**. With these 2 page types added in your app you'll be able to add in your new or existent app an Ordering feature.

How to setup:

1. For adding the new native **Product Order** page to your app access its **Dashboard**. Go to **Edit Pages** menu then click the "+" (Add New Page) button.

From the list of the page types available select the **Product Order** one and click the "NEXT" button.

<input type="radio"/>	Magazine Store	add, organize and sell your periodicals
<input type="radio"/>	Messenger	Allows users sending messages to each other via public conversations. When a new message is posted, all app users are notified.
<input type="radio"/>	Mobile	displays a mobile web page.
<input type="radio"/>	Notes	allows users to write and save notes inside the app.
<input type="radio"/>	Order	allows users to place an order from their mobile device
<input type="radio"/>	PN Topics	a page to edit topics (categories) for Push Notifications (news)
<input type="radio"/>	Product order	allows users to create a mobile store.
<input type="radio"/>	Scan Document	allow scanning a document via camera and convert to the PDF file.
<input type="radio"/>	Music Player	native and stylish audio player for iOS
<input type="radio"/>	Scoreboard Page	Allows users to fill out a scorecard for a boxing or MMA match and share it on Facebook and Twitter.
<input type="radio"/>	SharePoint client	displays editable content from SharePoint server
<input type="radio"/>	Slot Machine	links users to secret pages in your app if they are lucky
<input type="radio"/>	SMS	allows sending SMS from an iPhone.

In the next step you'll need to add a name for this page and click the "**Create**" button. Once the page is added, you are able to proceed with editing it.

Add new page

New Page Name: .html

Create

Cancel

****NOTE:** In addition to the *Product Order* page type, in your app will be added an *Order* page type. Please make sure to have only **1 (ONE) Order** page **per app**. How to setup the Order page type you can find in steps **5 → 6 → 7** of this tutorial.
