

## How To Make Unbranded Previewers

### *How to customize a previewer application?*

In short time after you'll request the Brandless Previewers option in support ticket, you'll find 4 new apps in your Application List on Appsmoment, these are App Previewer applications for all supported Appsmoment Platforms:

- iPhonePreviewer
- iPadPreviewer
- AndroidPreviewer
- KindlePreviewer

The Previewer apps are not just simple apps. This is a tool, a hardcoded tool that has very limited things to be customized.

You can not use these options from Previewer app dashboard to customize this tool:

- Backup/ Restore
- Edit Pages
- Page Settings
- Design Properties
- Navigation Settings
- Newsstand Properties / Content Publishing
- Class Manager

Bellow you will find a tutorial how to customize an iPhone previewer, these steps are similar for every previewer:

**1)** Go to *My Applications -> iPhonePreviewer's Dashboard -> AppStore Properties* - Here you need to fill-in fields with your app information and resources.

## App Store Properties

App Store App Name (max 50 characters):

Nam liber tempor cum soluta nobis eleifend option

App Store Keywords - comma separated words:

Nam liber tempor cum soluta nobis eleifend option

App Store Description:

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exerci tation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo consequat. Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi. Nam liber tempor cum soluta nobis eleifend option

50 chars (max 100 characters)

Primary Category:

Sports

Secondary Category :

Business

Save

## App Store Multimedia

Choose File No file chosen

Upload

App icon for the App Store

1024x1024 (PNG only)

Must be same image as Application icon, with a higher resolution.

2) Go to *My Applications* -> *iPhonePreviewer's Dashboard* -> *App Multimedia* - Please upload the App Graphics. Application icons and Splash Screen images for your Previewer Application.

### App Multimedia

Note: application icons must be the same or very alike images.

Application icon  
72x72px (PNG only):

No file chosen

Application icon for Retina display  
144x144px (PNG only):

No file chosen

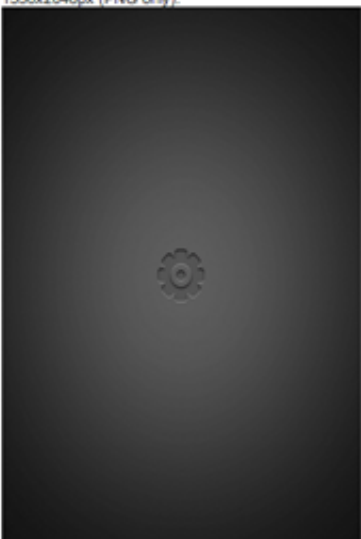

---

Splash Screen  
768x1024px (PNG only):

No file chosen

Splash Screen for Retina display  
1536x2048px (PNG only):

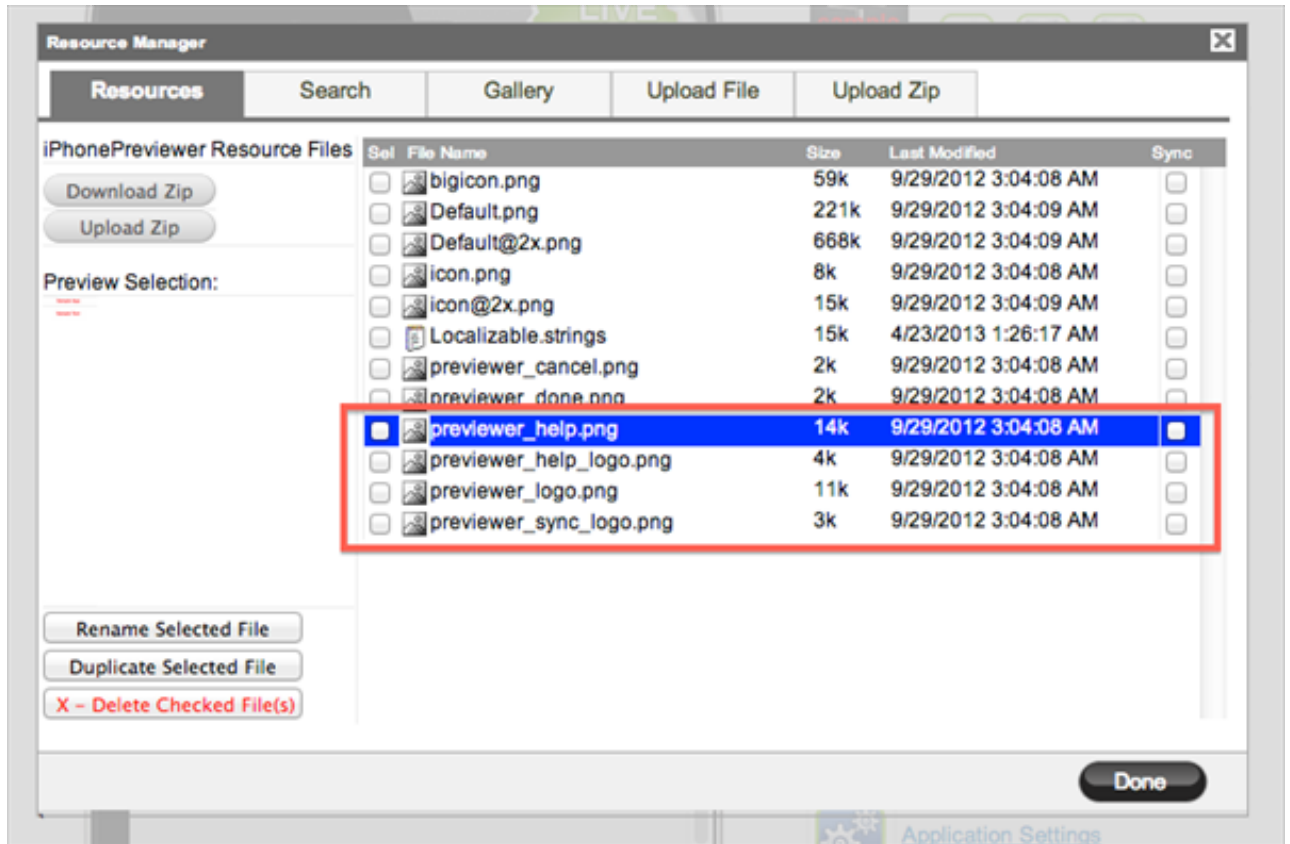

No file chosen

**3)** Next step is to replace all "SAMPLE" resources that are not listed in AppStore Properties or App Multimedia.

Go to *My Applications* -> *iPhonePreviewer's Dashboard* -> *Edit Pages* -> *Resource Manager* - Here you will need just to replace all "SAMPLE" images and icons from Resource Manager (file names are **Key Sensitive**)

Images you need to change:

- previewer\_help\_logo.png - 28x28px*
- previewer\_help.png - from 320x640 px*
- previewer\_logo.png - from 320x50px*
- previewer\_sync\_logo.png - 28x28px*

**\*\*NOTE:** You should customize your Previewers as is described in this step by step tutorial. Any other customizations will break this tool and will make it useless. You can not Synchronize this tool from the App Dashboard and can not Duplicate a Previewer. You will not be able to publish a previewer app if you'll change the AppID.

### ***How to publish a previewer application?***

For publishing a previewer application you'll need to send request to our support ticket and order the publishing.

Also, please choose in submission process the "*Build & Publish under my account*" option.
